   Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        A;Note: undetermined tyrosine residues in the carboxyl-terminal non-repetitive region a C;Comment: This protein is length polymorphic. Individuals may have between 21 and 125 partial repeats. The repeat shown is defined by Smal nuclease sites.

C;Comment: Serine and threonine residues in the tandem repeat domain are extensively gl C;Comment: For an alternative splice form without a tandem repeat domain, see PIR:S4814
